LUMA ROADS

Smart Road System
2050

CONCEPT OF SMART ROADS SYSTEM

ABOUT

The smart road technology will be using the AI(Artificial Intelligence) and IOT(Internet of Things) technology.

EFFICIENCY

It will help the drivers and pedestrians in crossing the roads and their safety.

It will help the drivers in driving at night.

It will guide the directions to the passengers.

It will help in contributing greener environment as there will be electric cars.

INSPIRATION
